DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Uekusa (JP359077942A).

Uekusa teaches an occupant crush protection system for a vehicle comprising a battery 53 mounted in the vehicle; an occupant protection device powered by the battery; a device control unit 24 for controlling the occupant protection device; a relay 34 for providing a power cut state for cutting power supply to the occupant protection device and a power supply state for supplying power to the occupant protection device from the battery; sensing means 51; and inherently the relay control means brings the relay to the power supply state only when the sensing means senses a high possibility of a collision. The occupant protection device comprises a seatbelt retraction device.

Allowable Subject Matter

3. Claims 2, 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
